

Get Ready for Hurricane Irma!

As you are all aware, Hurricane Irma is projected to hit Florida with a high probability of high winds and potential flooding. Please make sure you are ready!

Before the Storm...

- Install plywood or storm shutters over all glass surfaces, including doors and windows.
- Position sandbags around the base of doors and low windows to prevent flooding.
- Make sure your disaster safety kit is up to date. In your kit, include food, water, medicine, a first-aid kit, flashlights/batteries and important documents.
- Ensure that all items outdoors cannot become a projectile by either securing them or bringing them indoors.
- Take photographs of property and valuable items in case it is needed for insurance purposes.

During the Storm...

- Avoid windows and seek protection in a small, centrally location room on the lowest floor of your home.
- Turn refrigerators and freezers to coldest setting and only open them if absolutely necessary. This will help food last longer if power is lost.
- If you are evacuating, follow roads recommended by emergency workers. Others may be blocked or otherwise impassable.

After the Storm...

- Stay on firm ground and avoid standing water
- Avoid weakened bridges and washed out roads
- Do not drink or prepare food with tap water until officials say it is safe
- Do not light matches or candles as gas could be leaking nearby
- If your home received any damage, shut off power to all electric and gas to avoid electrocution or fire.

We hope everyone stays safe! We will be on site as quickly as possible to help ensure roadways are clear and assess any damage done to common elements.

Thank you!
